

Battery Recycling Program

Good for business and good for the environment.

Lead acid batteries are by far the most fully recycled of all consumer products. Recycling centers can recover more than 98% of the lead and plastic in a lead-acid battery. Once those reclaimed materials reach a battery manufacturer, they can account for 60-80% of the lead and plastic in a “new” lead-acid battery.

It’s a closed-loop lifecycle that can continue indefinitely. The millions of lead-acid batteries now starting vehicles, or powering industrial applications, have been and can continue to be recycled many times. It makes lead-acid battery recycling very green, from both a cost and resource-saving perspective.

It’s everyone’s responsibility, but EnerSys® makes it easier.

As the world’s leading industrial battery manufacturer, we recognize our obligation to lead the way in battery recycling. EnerSys® is proud to provide the personnel, facilities and documentation needed to operate a worldwide recycling program. EnerSys® can provide complete recycling certificates for peace of mind that your batteries have been properly recycled.

Battery distributors, dealers and end-users should recognize their obligations too. Once a battery is purchased, the owner is liable for its proper disposition. If your lead-acid battery is dumped in a landfill or shipped to a recycler that does not handle it properly, YOU may be held responsible for any resulting cleanup costs or environmental damage.

Plus, the stringent laws governing battery recycling, disposal and shipping are a complicated mix of state and federal statutes. Failing to comply with any of them can result in heavy fines and enforcement actions.

That’s why we’re making battery recycling easier for the entire industry. Along with our own batteries, the EnerSys Battery Recycling program accepts lead-acid batteries of all sizes, from all manufacturers. Our program makes compliance easier so you don’t have to analyze complicated state and federal regulations. Instead, you can focus on running your business while EnerSys provides a complete range of recycling support services.

THE RECYCLING LEADER	
Product	Percentage of materials recycled
Lead acid batteries.	98%
Tires	85%
Newspapers	63%
Aluminum Cans	58%
Glass Bottles	41%
