

**PRO-MARK**<sup>®</sup>  
UTILITY SUPPLY INC.

Model  
PM-TS3

*Supplying Cathodic  
Protection Solutions...*<sup>™</sup>

*CP TEST STATION (3")*

The **PM-TS3** CP Test Station is an enclosure that protects circuits and terminals. Pro-Mark's CP Test Station is also used in telecommunications as a grounding box. Test Stations are manufactured in the USA from high impact UV stabilized polycarbonate and have a lifetime warranty. **PM-TS3** Test Stations come standard with five stainless steel terminals and could be ordered with a High-Density Polyethylene conduit/support post. The **PM-TS3** is also available with custom graphics as a Test Station Marker Post. Pro-Mark **PM-TS3** CP Test Stations are in stock in all standard colors.

\* Custom Colors are available upon request.

**Accessories:** Bonding Straps (shorting bars), Lug terminals, colored Banana Jack terminals, CoverGuards, Reducers, Shunts, Stainless Steel Flange Brackets, Resistors, Rheostats and more...
